Virtual Exhibitions of Student Projects (Upper Primary)

Dear Parent,

We have all been in this pandemic together and have assimilated both the positive and the negative side of the situation worldwide. Even in the most difficult situation our students have come up with innovative ways to express their ideas, creations and solutions to global problems, proving that learning is unstoppable! This further reverberates a famous saying by Benjamin Franklin, **“Tell me, I’ll forget. Show me, I may remember. Involve me and I’ll learn.”**

We are happy to present to you the exemplary work done by our students from Grade 3 to Grade 6 as part of their 2nd virtual thematic exhibitions.

Turn it Around (Grades 3 to 6)

The students of Grades 3 to 6 present their virtual cross curricular exhibition founded on problem-based learning. Based on the EXPO 2020 themes, the students have brainstormed innovative solutions for some of the most pressing local and global issues using the Design Thinking Process. The students were introduced to different problem scenarios through provocations which were encouraged to **Empathize** with the presented scenario, **Define** the problem, **Ideate** solutions, **Create** and **Test** their **Prototypes**. It has been extremely satisfying to see our students work beyond expectations as they came up with innovative and mind-blowing solutions to these global problems! Our young global solutionaries have literally turned the situation around to possibilities!

You can access the exhibition by clicking on this link - [Turn It Around 2021 CCE Virtual Exhibition](#)

After you take a tour of this virtual exhibition, we request you to encourage our young students by providing your valuable feedback and comments on this link - [Feedback Turn It Around 2021](#)

Looking forward to seeing you all celebrate the work of our students as we congratulate them on their effort in putting their projects together for this one-of-its-kind event!

If we could see the world through the eyes of a child, we would see hope in everything. It is only a matter of perspective!

Warm regards,

Asha Alexander
