**CIRCULAR**  
**Stay Healthy this Season!**

17<sup>th</sup> February 2023

Dear Parent,

With the recent weather changes, we have observed an increase in the number of students falling ill with Flu, Fever, Cough and Chicken Pox. It is important for us to take care of our health during these times. We urge you to take preventive measures like washing your hands frequently, maintaining good hygiene and eating a balanced diet.

We care deeply about the safety and well-being of our students and staff. We would like to remind you that sending children to school when they are sick will result in the spread of illness among students and staff. This can put everyone at risk and make it difficult for us to maintain a safe learning environment. If your child has fever, rashes, or blisters, please keep them home from school and contact the doctor for further instructions.

Department of Preventive medicine recommends that your child must receive two doses of varicella vaccine. We highly recommend completing the vaccine schedule as soon as possible.

Kindly cooperate with us to ensure a healthy school community.

Warm regards,

**Asha Alexander**
