**Special Discounts On Apple Products For Gems Education**

---

Dear Parents,

Ramadan Kareem.

We are thrilled to share a **special discount** offer for Apple products that is available exclusively for **GEMS Education**. Apple products are widely used in education, and this offer provides an excellent opportunity for GEMS Education students, teachers, and staff to upgrade their devices at an **affordable price**.

JTRS is an **Apple Authorized Education Specialist** offering educational discounts on a range of Apple products, including Macs, iPads, and accessories. In addition, they provide **free home delivery** for all orders placed through their e-store, making it easy and convenient for our school community to take advantage of this offer. Please [click here](#) to know more about the available offers.

Additionally, they offer a **trade-in program** where users can exchange their old Apple devices for cash or credit towards the purchase of a new device. This not only helps our community members save money on their new purchases, but it also promotes environmental sustainability by properly disposing of old technology.

For the GEMS Education community, this offer can be a valuable opportunity to upgrade their devices and stay up-to-date with the latest technology.

Warm regards,

Asha Alexander
